

Editing & Deleting Entries

Made a typo? Logged the wrong time? Every reading and every meal entry can be edited or deleted at any time from the Sugar Log, Food Log, or Summary screens.

Editing a Reading

1

Find the Entry

Go to the Sugar Log screen, or open the Summary screen and navigate to the date you need.

2

Tap the Pencil ✎

Tap the ✎ pencil icon on the right side of any reading row. The edit modal slides up from the bottom.

3

Make Your Changes

You can change: type, date, time, value, notes, medication note.

4

Save

Tap Save Changes. A confirmation toast confirms the update.

Editing a Meal Entry

1

Find the Entry

Go to the Food Log screen, or the Summary screen for the meal's date.

2

Tap the Pencil ✎

Tap the ✎ pencil icon on the meal card. The edit modal slides up.

3

Make Your Changes

You can change: meal type, date, time, individual food items (add, remove, or edit qty/name), notes, and photos.

4

Save

Tap Save Changes to confirm.

Deleting an Entry

Inside any edit modal, scroll to the bottom and tap Delete this reading or Delete this meal. A confirmation alert appears before anything is removed.

Deletions are permanent and cannot be undone. If in doubt, edit the entry instead of deleting it.

Editing Entries From Summary

The Summary screen is often the most convenient place to edit past entries — navigate to the date using the strip or Select Date, then tap the ✎ pencil on any entry.

■ If you have incomplete meal entries, the ! icon will appear on the upper right to help you edit and complete your missing meal entries.

Adding a Missed Entry (Past Date)

All log screens support late entries. If you forgot to log yesterday's fasting reading, just open the Sugar Log, tap the Date field, and set it to yesterday. The entry will be saved with that past date and will appear correctly in the Summary.

GD SugarLog is a personal tracking tool and is not a substitute for medical advice.
